DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dent (US 2001/0030581) in view of Huh et al (US 2002/0136341).

Dent discloses an apparatus comprising:

first and second fractional-N synthesizers (802,804) to provide first and second, respective, modulated outphased signals; and
a digital signal processor (806) for controlling an instantaneous frequency of the first and second fractional-N synthesizers, respectively, based on a desired transmitted frequency.

Dent fails to disclose the digital signal processor (806) that includes the first and second sigma-delta modulator modules. As Huh et al describes referring to Fig.2, it is well known in the art that the dividing ratio of a fractional-N synthesizer is controlled by using a sigma-delta modulator. See Fig.2 and its description. Thus, it would have been obvious to one skilled in the art at the time the invention was made for the digital processor (806) of Dent to include first and second sigma-delta modulator modules for controlling an instantaneous frequency of the first and second fractional-N synthesizers based on a desired transmitted frequency.

Allowable Subject Matter

3. Claims 35-38, 41-54 are allowed.

Art Unit: 2611

4. Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
